elektrik underground 2007m [20 years motok]

*this free album was compiled for you december 2007.
it is not an best of album, but more a sonic picture
from some of the sound artists motok is helping.
here are eight selected pieces, wich nicely fit
together and create an ambience, wich you could
call motok's.*

*but motok's field is much wider. o.r.d.u.c. for
instance does only partly fit in. and the bearcage
does not fit in at all.*

*and to make it more a clew motok also thinks of
the visual part. not directly as in video-clip, but
more as in photograph, painting and design.*

*and to make it a real
motok, there is also
the part of the words:*

*enjoy this free album and
give some feedback.*
